

Welcome - getting started is easy

Follow the steps below to set up your app and device

- 1.** Clean the area of your windscreen where the device will go. We recommend either side of the rear-view mirror.
- 2.** Gently remove the plastic strip to engage the battery. Then peel off the sticky backing from the flat side of the device and give it a little shake to wake it up.
- 3.** Attach the flat, sticky side, to the top of the windscreen.
- 4.** If you haven't already, download the Quotemehappy Connect app. Check your App Activation email for your activation code.
- 5.** Once logged in, the app will guide you through the setup process to connect it to the device.
